Learning resources for success

"We would like to express our gratitude and feedback that the course was beneficial and (we would) recommend this course. Positive environment with a skilled and knowledgeable tutor, and good to work with other like minded staff from around the country. The course gave good whole system thinking and understanding of emotional intelligence and the effect these have on each other. We feel we will be able to incorporate our learning in our working and personal lives easily." Service manager Jo Kara to senior management in health service.

"As a mental health nurse moving into a leadership role in addictions, I found the course offered by Dynamic Education, Transitioning Clinicians to Leadership, very useful in terms of building on my skills base and giving me the confidence to fulfil my role in a more competent manner.
